

The Clock Drawing Test Instructions

General Information: Provide the patient with an 8.5 x 11-in. blank sheet of paper and a pencil.

Set-up: Equipment required includes a blank sheet of paper, a sheet of paper with a clock on one side, a pen, and a chair/table for ease of drawing.

Patient Instructions (Rouleau, Salmon et al. 1992):

The following instructions are given:

“I would like you to draw a clock, put in all the numbers, and set the hands for 10 after 11.”

Following this condition, the patients should be instructed to copy, as accurately as possible, a clock from a model. The model should contain all the numbers on the clock, be 3 inches in diameter, and located on the upper part of an 8.5 x 11-inch sheet of paper. The hands on the model should be set for 10 after 11. The patient is then instructed to copy the model on the lower part of the same sheet of paper.

- Instructions can be repeated if necessary
- Patients may use their non-dominant hand for drawing the clock

The Clock Drawing Test

Name: _____

Date: _____

Draw a clock with all the numbers, and set the hands for 10 after 11.

The Clock Drawing Test

Name: _____

Date: _____

Copy this clock below.
